ABOUT

Dental technicians are important members of a successful team in the practice of occlusal medicine according to the Vienna School of Interdisciplinary Dentistry. This course has been developed especially for dental technicians who want to immerse themselves into the "Slavicek concept". The goal of this curriculum is to impart the fundamental knowledge and practical methods about wax-up for different dental classes and for the production of splints within this concept. This

course offers a fundamental base on functional dentistry using patient-specific parameters. The course includes hands-on work in analog as well as digital workflows compatible with the principles of individualized functional dentistry proposed by VieSID.

The combination of theoretical lectures and practical training, guided by the instructors, provides the participants with new knowledge and skills ready to be applied in the daily working life.

INSTRUCTORS AND ASSISTANT

DT Stefan Thunert, MSc

Stefan Thunert, DT, is a specialist for in functional and esthetical dental technology following the VieSID's concept in reconstructive dentistry. Since 2000, he owns a dental laboratory, and achieved a Master of Science at the Danube University in Krems, in 2011. He joined the VieSID

lecturer team in 2014.

DT Karin Graichen, MSc

Karin Graichen, DT, is a highly experienced teacher in dental techniques and joined the VieSID team in 2008. She began to work as a dental technician in 1990, opening her own dental laboratory 10 years later. She now coordinates a large team of collaborators in her laboratory.

Her postgraduate education includes a MSc in Dental Sciences for Dental Laboratory at Danube University Krems, Austria.

Odt. Logreco Francesco, MSc

Francesco Logreco, DT, is the owner of the DSC laboratory in Conversano, Italy. He specialized in computer-aided applications in the field of dental technology. He obtained a dental technician diploma through IPSIA, Bari, Italy, in 1999. In 2015, he achieved a Hyperdent certification as a cam programmer and completed the practical

course on coronal anatomy at the SA.VI.DENT laboratory by Lanfranco Santocchi. In 2019, he completed the VieSID dental technician course and in 2023 the VieSID basic curriculum. He assists the VieSID dental technician courses since 2024, contributing with his know-how of digital techniques.

TOPICS

The curriculum is divided into 3 modules / 3 days each module / total workload of 72 hours

- Introduction and principles of the "Slavicek concept"
- Fundamentals in model work and facebow, arbitrary and axis mounting, inc. mounting of digital impressions
- "How to use" – articulator and its additional parts
- Wax up class I, in the analog and digital environments
- Repetition of class I, homework control
- Theoretical part about class II, splint therapy, use of CPV (Condylar-Position-Variator)
- Splint production in exocad
- Wax up class II
- Repetition of class II, homework control
- Lecture of all classes I / II / III
- Theory about splints according to "Slavicek concept" (retrusive guidance on splint surface)
- Wax up class III
- Repetition of the whole concept, therapeutically overlays
- Discussion about the concept based on cases, different dental classes and possibilities in the digital world
- Discussion of the use of new technologies within the VieSID's concept

GENERAL INFORMATION

Host	Medical University of Vienna & University Clinic of Dentistry Vienna
Organized by	VieSID [®] Vienna School of Interdisciplinary Dentistry in cooperation with the Medical University of Vienna
Lecturers	DT Stefan Thunert, DT Karin Graichen, Odt. Francesco Logreco
Course language	English / with possibility of Russian and Ukrainian translation
Target group	Dental Technicians and Dentists
Certificate	Issued by VieSID and the Medical University of Vienna
Venue	Dental University Clinic of the Medical University of Vienna, Sensengasse 2a, 1090 Vienna, Austria
REGISTRATION	Please register at: www.viesid.com , or send your registration form to: info@viesid.com

To guarantee intensive and effective lessons, the maximum number of participants is limited.
