**DIGITAL DENTAL TECHNOLOGIES WITHIN THE VIESID CONCEPT OF INDIVIDUALIZED FUNCTIONAL DENTISTRY**

This course is meant to provide the participants with the theoretical and especially practical knowledge necessary to apply state-of-the-art digital dental technologies within the VieSID concept. Thus, it is more suited to those who already have knowledge and understanding of occlusion and occlusal design according to the VieSID concept. This 3-days course is conceived for both dental technicians and dentists who are interested in digital protocols for intraoral model articulation,

treatment planning and design, and is 3 days long. Exocad users will benefit the most from the 3rd day. Non-exocad users can take part as observers, but no effort will be made to level them up to exocad users.

Note: The 3rd day of the course will be mostly benefited by exocad users. Non-exocad users can take part as observers, but no effort will be made to level them up to exocad users.

**INSTRUCTOR**

**DT Logreco Francesco**

Francesco Logreco, DT, is specialized in computer-aided applications in the field of dental technology that he practices in his DSC laboratory in Conversano, Italy. He obtained a dental technician diploma through IPSIA, Bari, Italy, in 1999. In 2015, he achieved a Hyperdent certification as a cam programmer and completed the practical course on coronal anat-

omy at the SA.VI.DENT laboratory. He completed the VieSID dental technician course (2019), the Basic Curriculum (2023) and is undertaking VieSID advanced courses. He assists in the VieSID dental technician courses since 2024, contributing with his deep understanding of the Slavicek concept and know-how on digital techniques.

## SCHEDULE

---

### Day 1

- GAMMA digital protocol and CADIAS 3D
- Hands-on Training: analysis of the meshes, GAMMA digital protocol and CADIAS 3D, interface CADIAS 3D – exocad, evaluation of aesthetic parameters using facial scans

### Day 2

- Hands-on Training: analysis of the meshes
- The use of the curves of Spee and Wilson and occlusal plane
- Coronal anatomy
- Demonstration of crown modelling in exocad (Class I waxup)
- Theoretical notions for the construction of a splint in exocad using the GAMMA's parameters

### Day 3

- Hands on training: crown modelling in exocad (Class I wax-up)
- Hands on training: construction of a digital bite

## GENERAL INFORMATION

---

<b>Host</b>	Medical University of Vienna & University Clinic of Dentistry Vienna
<b>Organized by</b>	VieSID <sup>®</sup> Vienna School of Interdisciplinary Dentistry in cooperation with the Medical University of Vienna
<b>Lecturers</b>	DT Francesco Logreco
<b>Course language</b>	English / with possibility of Russian and Ukrainian translation
<b>Target group</b>	Dental Technicians and Dentists
<b>Prerequisites</b>	Previous knowledge of the VieSID concept (VieSID Basic Curriculum or Dental Technician Course ). The third day of program is specifically thought for exocad users. Non-exocad users can participate as observers.
<b>Requirements</b>	Participants are required to bring their own laptop. A portable exocad license is necessary for the third day of the course. The exocad license will not be provided by VieSID.
<b>Certificate of Attendance</b>	Issued by VieSID and the Medical University of Vienna
<b>Venue</b>	Dental University Clinic of the Medical University of Vienna, Sensengasse 2a, 1090 Vienna, Austria

**REGISTRATION** Please register at: [www.viesid.com](http://www.viesid.com), or send your registration form to: [info@viesid.com](mailto:info@viesid.com)

To guarantee an optimum learning experience, the maximum number of participants is limited.
